# **02 Lab Safety and Machine Use**

Content Area: Tec

Course(s):

**Technology** 

Time Period: Length:

Status:

Full Year 1.5 Weeks Published

### **General Overview, Course Description or Course Philosophy**

This full year honors course continues to emphasize the application of integrated STEM (Science, Technology, Engineering and Mathematics) principles and the design method to invent solutions to real world problems through robotic applications. Students will identify problems, research, design and fabricate solutions. Problem solving, critical thinking and design skills are taught through a variety of activities. Handson themes include structural and robotic systems, as well as system control technology. This course provides all students with valuable skills such as: problem solving, design, creative thinking, systems thinking, team work, documentation, programming and computer applications.

#### **OBJECTIVES, ESSENTIAL QUESTIONS, ENDURING UNDERSTANDINGS**

Rules and procedures help students work safely in the lab and work area. Recognizing and describing potential risks and hazards associated with not following lab/equipment rules is essential for success in the classroom and workplace.

#### CONTENT AREA STANDARDS

TECH.8.2.12.D.3

Determine and use the appropriate resources (e.g., CNC (Computer Numerical Control) equipment, 3D printers, CAD software) in the design, development and creation of a technological product or system.

# **RELATED STANDARDS (Technology, 21st Century Life & Careers, ELA Companion Standards are Required)**

CRP.K-12.CRP2

Apply appropriate academic and technical skills.

#### STUDENT LEARNING TARGETS

# **Declarative Knowledge**

St.	udents	337i11	understan	d that

- It is necessary to be certified on all equipment in order to use it safely.
- There are negative health and safety consequences to not following lab safety rules.
- The health and longevity of the lab equipment is dependent on students utilizing them properly.

#### **Procedural Knowledge**

Students will be able to:

- Determine the appropriate resources (lab and safety equipment) in the design, development and creation of a technological product or system.
- Use the appropriate resources (lab and safety equipment) in the design, development and creation of a technological product or system.
- apply appropraite academic and technical skills.

#### **EVIDENCE OF LEARNING**

#### **Formative Assessments**

Safety quizzes: General lab safety, Band saw, Drill press, Hand tools, Eye Safety, Scroll Saw and any other approprate material processing equipment quizzes.

Observation of hands on activities.

#### **Summative Assessments**

Material processing widget

# **RESOURCES (Instructional, Supplemental, Intervention Materials)**

Teacher notes and quizzes available through Google Classroom/Drive.
