General Overview, Course Description or Course Philosophy

Spanish 3H

The study of another language and culture enables individuals, whether functioning as citizens or workers, to communicate face-to-face and by virtual means in appropriate ways with people from diverse cultures. An education in world languages fosters a population that: communicates in more than one language with the levels of language proficiency that are required to function in a variety of occupations and careers in the contemporary workplace, exhibits attitudes, values, and skills that indicate a positive disposition and understanding of cultural differences and that enhance cross-cultural communication and values language learning as a global literacy as well as for its long-term worth in fostering personal, work-related, and/or financial success in our increasingly interconnected world.

This course provides students with the fundamental background to speak, to read, to write, and to understand the target language. A great deal of stress is placed on the development of audio-lingual skills including correct pronunciation, intonation, and accentuation. There will be a continued emphasis on the development of listening, speaking, reading and writing skills using the communicative approach. Additional material for development of reading skills is provided for each student. The units on the culture and civilization of the target culture are expanded.

There will be a continued emphasis on the three modes of communication: interpretive, interpersonal, and presentational. Different opportunities will be provided to develop the listening, speaking, reading and writing skills using the communicative approach. Cultural aspects of the target language/culture will be expanded as well. Students are introduced to songs, movies and short literature selections throughout the year. The use of authentic materials will be provided to each student.
