07_Exploring Careers in Aviation and Aerospace

Content Area: **Technology**

Course(s):

Full Year

Time Period: Ful

Length: 10 Days and Ongoing

Status: **Published**

General Overview, Course Description or Course Philosophy

Students will learn about a variety of aviation and aerospace careers, as well as the education, training, and certification requirements needed for each. Students will begin by exploring flying careers, including airline, cargo and drone operations, military aviation, and flight instructing. Students will go on to explore aerospace engineering careers, including specialties such as propulsion and navigation. Finally, students will look at the unique skills needed to be a successful air traffic controller and participate in a simulation that demonstrates just how challenging the job can be. They'll complete the unit by exploring different types of aviation mechanic jobs.

OBJECTIVES, ESSENTIAL QUESTIONS, ENDURING UNDERSTANDINGS

Objectives, essential questions and enduring understandings are outlined within each unit of study and/or Curricular Calendar.

CONTENT AREA STANDARDS

TECH.8.1.12.A.2	Produce and edit a multi-page digital document for a commercial or professional audience and present it to peers and/or professionals in that related area for review.
TECH.8.2.12.C.5	Create scaled engineering drawings of products both manually and digitally with materials and measurements labeled.
TECH.8.2.12.C.6	Research an existing product, reverse engineer and redesign it to improve form and function.
TECH.8.2.12.C.7	Use a design process to devise a technological product or system that addresses a global problem, provide research, identify trade-offs and constraints, and document the process through drawings that include data and materials.
TECH.8.2.12.D.1	Design and create a prototype to solve a real world problem using a design process, identify constraints addressed during the creation of the prototype, identify trade-offs made, and present the solution for peer review.
TECH.8.2.12.D.3	Determine and use the appropriate resources (e.g., CNC (Computer Numerical Control) equipment, 3D printers, CAD software) in the design, development and creation of a technological product or system.

RELATED STANDARDS (Technology, 21st Century Life & Careers, ELA Companion Standards are Required)

CRP.K-12.CRP4 Communicate clearly and effectively and with reason. CRP.K-12.CRP6 Demonstrate creativity and innovation. CRP.K-12.CRP8 Utilize critical thinking to make sense of problems and persevere in solving them. CRP.K-12.CRP11 Use technology to enhance productivity. CRP.K-12.CRP12 Work productively in teams while using cultural global competence. 9-12.HS-ETS1-2 Design a solution to a complex real-world problem by breaking it down into smaller, more manageable problems that can be solved through engineering. 9-12.HS-ETS1-1 Analyze a major global challenge to specify qualitative and quantitative criteria and constraints for solutions that account for societal needs and wants. 9-12.HS-ETS1-3 Evaluate a solution to a complex real-world problem based on prioritized criteria and trade-offs that account for a range of constraints, including cost, safety, reliability, and aesthetics, as well as possible social, cultural, and environmental impacts.	CRP.K-12.CRP2	Apply appropriate academic and technical skills.
CRP.K-12.CRP8 Utilize critical thinking to make sense of problems and persevere in solving them. CRP.K-12.CRP11 Use technology to enhance productivity. STUDENT LEARNING TARGETS

Student learning targets are outlined within each unit of study and/or Curricular Calendar.

Declarative Knowledge

Declarative knowledge is outlined within each unit of study and/or Curricular Calendar.

Procedural Knowledge

Procedure knowledge is outlined within each unit of study and/or Curricular Calendar.

EVIDENCE OF LEARNING

Formative Assessments

Formative assessemnts are included and outlined in each unit of study.

Summative Assessments		
Summative assessemnts are included and outlined in each unit of study.		
RESOURCES (Instructional, Supplemental, Intervention Materials)		
Materials and resources are outlined in each unit of study.		
INTERDISCIPLINARY CONNECTIONS		
Interdisciplinary connections are outlined in each unit of study.		
ACCOMMODATIONS & MODIFICATIONS FOR SUBGROUPS		
Accommodations & Modifications are outlined in each unit of study.
