# **01: Newton's Laws & Motion Copied from: Physical Science Resource, 3**

Content Area: Special Education

Course(s):

Time Period: Full Year
Length: 4 weeks
Status: Published

#### **General Overview, Course Description or Course Philosophy**

Physical Science establishes a basic approach to the fundamentals of chemistry and physics. The following concepts will be explored: atomic structure, chemical bonding, chemical reactions, the periodic table, kinetic theory, and kinematics. The use of technology to gather and analyze data will be incorporated. This course is concept-oriented with a focus on Chemistry and Physics in the real world. Laboratory work and special projects will facilitate active learning and accommodate different learning styles.

#### **OBJECTIVES, ESSENTIAL QUESTIONS, ENDURING UNDERSTANDINGS**

Students will understand that:

- every object resists change to its state of motion mass is a measure of an object's inertia
- weight is a measure of the force of gravity acting on an object
- force causes acceleration, and an object cannot accelerate unless it is acted on by a net force
- acceleration is directly proportional to net force and inversely proportional to mass.

#### **CONTENT AREA STANDARDS**

SCI.HS-PS2-1 Analyze data to support the claim that Newton's second law of motion describes the

mathematical relationship among the net force on a macroscopic object, its mass, and its

acceleration.

### **RELATED STANDARDS (Technology, 21st Century Life & Careers, ELA Companion Standards are Required)**

MA.K-12.2 Reason abstractly and quantitatively.

MA.K-12.4 Model with mathematics.

LA.RST.9-10.1 Accurately cite strong and thorough evidence from the text to support analysis of science

and technical texts, attending to precise details for explanations or descriptions.

LA.WHST.9-10.9 Draw evidence from informational texts to support analysis, reflection, and research.

TECH.9.4.12.CT.1 Identify problem-solving strategies used in the development of an innovative product or

practice (e.g., 1.1.12acc.C1b, 2.2.12.PF.3).

#### **EVIDENCE OF LEARNING**

Refer to the 'Formative Assessments' and 'Summative Assessments' sections.

#### **Formative Assessments**

- Checks for understanding during lesson
- Online feedback (CK-12)
- Do Now activities.
- Student-centered questioning and discussion that is facilitated by instructor.
- Exit Tickets.

#### **Summative Assessments**

- Benchmarks departmental benchmark given at the end of MP1, MP2, and MP3
- Alternative Assessments
  - Lab inquiries and investigations
  - Lab Practicals
  - Exploratory activities based on phenomenon
  - Gallery walks of student work
  - Creative Extension Projects
  - Build a model of a proposed solution
  - Let students design their own flashcards to test each other
  - Keynote presentations made by students on a topic
  - Portfolio
