OBJECTIVES, ESSENTIAL QUESTIONS, ENDURING UNDERSTANDINGS

Essential Questions:

- What is dance?
- What is the definition of composing?
- What is choreography?
- What are the similarities and differences between composing dance and other art forms?
- What are the cognitive, psychomotor, and affective steps that are involved in the creative process of dance composition?
- How does the process of dance composition begin?
- How does kinesthetic awareness and technical ability affect the performance of dance?
- How can the degree of artistry affect the ability to comprehend or create a choreographic work?
- How does anatomical and kinesthetic awareness shape the creative process?
- How can issues of gender, ethnicity, socio-economic status, politics, age, and physical conditioning be interpreted through movement?

Enduring Understandings:

- There is a vast difference in the processes of performing and composing dance works.
- Creating master works in dance requires an equally acute comprehension of dance forms, movement themes, and choreographic structures.
- The role of a choreographer is different than that of a performer.
- Artistic ability, diversity, and personal intent are directly related to the aesthetic quality of a choreographic work.
- Improvisation is a stimulus for increasing movement vocabulary, exploring anatomical and emotional instinct, and inspiring dance composition.
- Stimuli for creating master dance works can be auditory, visual, kinesthetic, tactile, or ideational.

- Existence, development, and variation of a motif are essential to the cohesive development of a choreographic work.
- Integration and manipulation of action, qualitative, spatial, and relationship elements are essential to the completion of a choreographic work.
