Unit Overview

One of the key principles in the Constitution is the separation of powers thus giving us the three branches of government. This separation has helped maintain a national government strong enough to be effective yet safeguarding individual rights. In this unit, students will explore the Federal Government's powers and structure. Furthermore, students will examine the structure of the Legislative, Executive, and Judicial Branch.

Enduring Understandings

There are legislative (spending money, dealing with foreign countries) and Non legislative (check other branches, impeach) powers. They also are limited in their powers to protect the American citizen. The main job of the president is to execute the laws passed by the Congress as well as make treaties with other countries and serve as commander in chief of the armed forces. There are three types of federal courts: district courts, courts of appeals, and the Supreme Court.
