## Unit Overview

---

Human growth and development is ongoing from the time we are infants to mature adults. We grow physically, socially, mentally, and emotionally as we interact with our environment. Family members impact the development of their children physically, socially, and emotionally.

## Enduring Understandings

---

## Essential Questions

---

How can we relate our understanding physical, emotional, and social aspects of human growth/development and reproduction to differentiate between the stages of life and relate it to our own lives?

## Learning Objectives

---

Grades 3, 4, and 5

Distinguish types of relationships (e.g., family, friend, romantic) experienced by adolescents and determine healthy characteristics (e.g., trust, communication, honesty) that may influence each relationship.

Explain how qualities of a family (e.g., common values, love, emotional support) are fostered and may influence family members.

Grade 4 Only

Chart the stages of the life cycle and categorize by age.

Grade 5 Only

Create a list of gender-based stereotypes and cite counter examples.

Identify the difference between sexual orientation and gender identity.

Differentiate the physical, social, and emotional changes occurring during puberty for males and females and explain how these changes influence self-care.

Explain why puberty begins and ends at different ages for different people.

Identify different ways pregnancy can occur, including IVF and surrogacy.

Explain the process of fertilization and where their genetics come from.

Summarize the stages of pregnancy and reproduction from fertilization, cell division, embryonic and fetal development
