Unit Overview

It is during post-production that students will truly realize the impact of the decisions and choices they made during pre-production and production. For example, they will see why it's important to shoot a master shot in addition to medium and close-up shots. (In news production this is referred to as b-roll and cutaways. In filmmaking, call it "coverage.") This is important to create continuity and to explore options during your edit session.

Enduring Understandings

Planning is the first step of the design process. Whether it is in visual art, woodshop, or STEAM, planning by designing is an integral part of the creation process. Once planning is complete, artists move to the next phase which is executing their plan. Cinematography is planned and purposeful; directors, cinematographers, and storyboard artists spend a great amount of time planning out each shot and how the camera will be used to tell the story before filming begins.

Essential Questions

Cinematography is the art and craft using photography composition skills, cinematic language, and light design to create the look and feel of a film.

Are we telling the story we want to tell?

Are we creating a flow during the edit?

Is the sound enhancing the production?

What role does post-production play in shaping the finished product?

Film is a visual medium; information is primarily communicated through moving images.

The most basic building block of film is the shot. Films are made up of a large number of shots that have been sequenced together to tell a cohesive story.

Learning Objectives

Identifying and analyzing the types of shots in visual media, as well as the purpose behind the selection of each shot.

Identifying and analyzing the types of angles in visual media, as well as the purpose behind the selection of each angle.

Writing reflections to evaluate their work and progress.

Identify structural Editing: Overall Pacing; Scene Order; Setup, Reminder, and Payoff

Identify momentary editing; Types of Cuts/Transitions, Continuity, and Flow.

Identify types of cuts/transitions: Cutaway, Cutting On Action, Cross-Cutting (Parallel Editing), Jump Cut, Montage, Match Cut, Eye-Line Match Cut, Shot/Reverse Shot, Smash Cut, L Cut, J Cut, Cross Dissolve, Fade In/Out, Iris, Wipe, Invisible Cut
