# **Unit 7 - Patterns and Sequences**

Content Area: Mathematics

Course(s):

Time Period: December
Length: 3-4 weeks
Status: Published

#### **Unit Overview**

Unit 7 connects with the theme of Patterns in Our World, which centers around nonnumeric and numeric patterns in real-world applications. Studetns will learn the different aspects of patterns and sequences, and that equations are often used to represent patterns and to solve problems arising in everyday life. Students will analyze the relationships found in patterns and use those relationships to draw conclusions.

## **Essential Questions**

"How are patterns used in mathematics?"

#### **Content**

Nonnumeric Patterns

## **Lessons/Learning Scenarios**

MyMath Grade 4

Chapter 7: Lessons 1-9

#### **Standards**

CCSS.Math.Content.4.OA.A.3 Solve multistep word problems posed with whole numbers and having whole-number

answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and

estimation strategies including rounding.

CCSS.Math.Content.4.OA.C.5 Generate a number or shape pattern that follows a given rule. Identify apparent features

of the pattern that were not explicit in the rule itself.
