

# B. Living Things

Content Area: **Science**  
Course(s): **Science K**  
Time Period: **Trimester 1**  
Length: **6 weeks**  
Status: **Published**

## Unit Overview

---

In this unit students will compare living and nonliving objects. They will make and discuss observations and will be able to sort between things that are living and nonliving.

## Essential Questions

---

What can you tell about living things?

What are living things?

## Content

---

Plants and animals are living things, because they breathe and take in food.

## Skills

---

Identify and discuss characteristics of living and non living things.

## Assessments

---

Interactive Science Journal: What are living things?

## Lessons/Learning Scenarios

---

## Standards

---

SCI.K-2.5.2.2.A.a	Living and nonliving things are made of parts and can be described in terms of the materials of which they are made and their physical properties.
SCI.K-2.5.3.2.A.1	Group living and nonliving things according to the characteristics that they share.

## Resources

---

Plants

Rocks

Magnifying glasses

Chapter 3 activity cards.

Living and Non Living match game.
