Module Overview

This phonics module supports students in mastering key decoding strategies and phonics patterns, beginning with syllable division using the VC/CV pattern. Students practice breaking words into manageable parts to improve word recognition and spelling, focusing on words with this common syllable structure. Handwriting instruction introduces cursive letters c, a, d, g, q, and o, while irregular words like beauty and beautiful are taught for reading fluency and vocabulary development. Fluency work emphasizes phrasing and intonation to enhance oral reading skills. As the module progresses, students explore r-controlled vowels, starting with ar /ar/ and then expanding to are, air, and ear /air/ patterns. They also learn to distinguish homophones through spelling and context. Cursive handwriting continues with targeted practice of letters i, t, p, u, w, j, e, l, f, h, and b. Irregular words such as heart, toward, and together are introduced to further build reading fluency. Students refine their oral reading with lessons in expression, accuracy, and self-correction, fostering greater confidence and fluency.
