GRADE 4– Gifted and Talented (Trimester 2 Jan- Mar)

Mission Statement

The primary goal of the Swedesboro-Woolwich School District is to prepare each student with the real life skills needed to compete in a highly competitive global economy. This will be achieved by providing a comprehensive curriculum, the integration of technology, and the professional services of a competent and dedicated faculty, administration, and support staff.

Guiding this mission will be Federal mandates, including No Child Left Behind, the New Jersey Core Curriculum Content Standards, and local initiatives addressing the individual needs of our students as determined by the Board of Education. The diverse resources of the school district, which includes a caring PTO and active adult community, contribute to a quality school system. They serve an integral role in supporting positive learning experiences that motivate, challenge and inspire children to learn.

Unit Overview

FOURTH GRADERS DO NOT START G&T UNTIL OCTOBER**

In Trimester 2, students will learn to:

- Learn about Statistics, practice basic math skills (addition, subtraction, multiplication, division) and compete against one another using NBA Math Hoops Game
- Participate in a Estimation Measurement Competition
- Research their projects for STEAM Night
- Create their STEAM Night Projects and displays

Pacing Guide (Yearlong Pacing as Separated by Units)				
Unit Title	Duration (How many days/weeks?)	Standards (NJSLS)	Learning Scales	Criteria for Success (How will students demonstrate understanding?)
STEAM/Math	20 Class Periods, 2 class periods per 6 day cycle weeks.	4.NF.B. Build fractions from unit fractions by applying and	Link Scales with Targets	Students will learn how to compute statistics and

T		
	extending previous	compete with one another
	understandings of operations	using the NBA Math Hoops
	on whole numbers.	
		Students will participate in an
	4NF.C. Understand decimal	estimation competition
	notation for fractions, and	amongst each other in teams
	compare decimal fractions. 5.	to practice measurement.
	Express a fraction with	(using non-measurement and
	denominator 10 as an	measurement devices)
	equivalent fraction with	
	denominator 100, and use this	
	technique to add two fractions	Students will research and
	with respective denominators	create projects that will be
	10 and 100.4 For example,	displayed at Steam Night in
	express 3/10 as 30/100, and	April. Students will come up
	add 3/10 + 4/100 = 34/100. 6.	with a theme for their projects
	Use decimal notation for	and we will divide up the
	fractions with denominators	research among the members
	10 or 100. For example,	of G&T in all grades. (Previous
	rewrite 0.62 as 62/100;	years have included having a
	describe a length as 0.62	recycling themed arcade and
	meters; locate 0.62 on a	an air and space museum.)
	number line diagram. 7.	
	Compare two decimals to	
	hundredths by reasoning	
	about their size. Recognize	
	that comparisons are valid	
	only when the two decimals	
	refer to the same whole.	
	SCI.3.3-LS4-4 Make a claim	
	about the merit of a solution	
	to a problem caused when the	
	environment changes and the	
	types of plants and animals	
	that live there may change.	

SCI.4.4-ESS3-2 Generate and compare multiple solutions to reduce the impacts of natural Earth processes on humans.
SCI.3-5.3-5-ETS1-1 Define a simple design problem reflecting a need or a want that includes specified criteria for success and constraints on materials, time, or cost.
(GIFT.PK-12.1.3.1) Educators provide a variety of research based grouping practices for students with gifts and talents that allow them to interact with individuals of various gifts, talents, abilities, and strengths. (GIFT.PK-12.23.3.4.2) Educators use differentiated product based
assessments to measure progress of students with gifts and talents

Possible Assessment and Instructional Modifications				
Special Education	At-Risk (<u>Math Strategies</u> and <u>ELA Strategies</u>)	<u>Gifted</u>	English Language Learners	
*All teachers of students with special needs must review each student's IEP. Teachers must then select the appropriate modifications and/or accommodations necessary to enable the student to appropriately progress in the general curriculum. Possible Modifications/Accommodations Extra time on assessments Use of a graphic organizer Use of concrete materials and objects (manipulatives) Opportunities for cooperative partner work Assign fewer problems at one time (e.g., assign only odds or evens) Differentiated center-based small group instruction If a manipulative is used during instruction, allow its use on a test Provide reteach pages if necessary Provide several ways to solve a problem if possible Provide visual aids and anchor charts Tiered lessons and assignments Highlight key directions Test in alternative site Use of word processor Allow for redos/retakes Link Folder of Specific Resources (modified assignments or activities)	The possible list of modifications/accommodations identified for Special Education students can be utilized for At-Risk students. Teachers should utilize ongoing methods to provide instruction, assess student needs, and utilize modifications specific to the needs of individual students. In addition the following may be considered: Additional time for assignments Review of directions Review sessions Use of mnemonics Have student restate information Provision of notes or outlines Concrete examples Support auditory presentations with visuals Use of a study carrel Assistance in maintaining uncluttered space Peer or scribe note taking Space for movement or breaks Extra visual and verbal cues and prompts Books on tape	 Enrichment projects Higher-level cooperative learning activities Provide higher-order questioning and discussion opportunities Tiered centers Tiered assignments Alternate assignments/ enrichment assignments Provide texts at higher reading level Extension activities Pairing direct instruction w/coaching to promote self directed learning Link to Folder of Specific Resources (e.g. Leveled texts, project descriptions) 	 Continue practicing vocabulary Choice of test format (multiple-choice, essay, true-false) Vary test formats Read directions to student Provide study guides prior to tests Clarify test directions, read test questions Read test passages aloud (for comprehension assessment) Link to Folder of Specific Resources (e.g. Leveled texts, visual sets) 	

	 Graphic organizers Preferential seating Reduction of distractions Answers to be dictated Follow a routine/schedule Teach time management skills Agenda book and checklists Adjusted assignment timelines Varied reinforcement procedures Work in progress check
