Module Overview

What is that bird in your neighborhood—and why does it live there? In this module, children will learn about the different habitats where animals live. Hot deserts, warm rainforests, and cool, underwater habitats all provide food and shelter for the animals that live there. Through reading a variety of texts and collaborative work, children will explore how the conditions in different habitats help different animals to survive. After reading this module’s texts, children should have a greater appreciation for the complexity of animal habitats.

Essential Question: How do living things in a habitat depend on each other?
