## Module Overview

---

This descriptive essay writing module helps students develop their ability to describe a topic with clarity and detail while strengthening their understanding of nouns and sentence structure. The module begins by priming students and the text to build interest and background knowledge, followed by reading a mentor text and exploring vocabulary related to descriptive writing. In the early stages of the writing process, students prepare to write and identify a specific topic to describe. As they move into drafting, they learn the key elements of informational text and how to organize their ideas clearly. Revising lessons focus on improving sentence structure and elaborating on ideas, with opportunities for peer conferencing and feedback.

Grammar instruction is integrated throughout the module to support students’ writing. Early grammar lessons focus on recognizing nouns for people, animals, places, and things, and using them accurately in writing. As students revise and edit, they review singular and plural nouns, practice adding –s and –es, and learn to spell irregular plural nouns. Instruction also includes the use of collective nouns and reinforces the use of simple sentences and varied sentence types. Peer proofreading and final publishing allow students to refine and proudly share their completed descriptive essays. This module builds both writing confidence and essential grammar skills through structured, engaging practice.
