### **Big Idea**

---

Rome's location and climate helped it to become a major world power. In 509 BCE, Roman nobles overthrew the monarchy and established a new form of government called a republic. From a small town in Italy, Rome grew to become the center of one of the world's greatest empires. Like the Greeks, whom they admired, the Roman had a lasting influence on world history.

The legacy of Rome was great. The Romans made many huge advances in engineering and architecture, and they developed advanced systems of written laws and government. In the first century AD, a new religion called Christianity appeared and spread throughout the empire.

The unit will focus on the rise of Rome, the growth and spread of Christianity, and the ultimate division and decline of one of the world's greatest empires.
