Big Idea

Chapter 11 - In the first part of the nineteenth century, new inventions brought new ways of making basic products. However, differences between the North and the South increased with the growth of industry. The invention of the cotton gin increased the South's dependence on the labor of enslaved people. As settlement spread westward, debates over slavery heightened tensions between North and South.

Chapter 12 - By the mid-1800s, people were seeking reform in many areas of American life, including education. Abolitionists sought an end to slavery in the United States. Other reformers sought to win political and economic equality for women. At the same time, American artists, writers, and musicians had made much progress in developing a distinct style.

Chapter 13 - By the mid-1800s, people were seeking reform in many areas of American life, including education. Abolitionists sought an end to slavery in the United States. Other reformers sought to win political and economic equality for women. At the same time, American artists, writers, and musicians had made much progress in developing a distinct style.

Interdisciplinary Connections

- Academic and Technical Rigor - Projects are designed to address key learning standards identified by the school or district.
- Authenticity - Projects use a real world context (e.g., community and workplace problems) and address issues that matter to the students.
- Applied Learning - Projects engage students in solving problems calling for competencies expected in high-performance work organizations (e.g., teamwork, problem-solving, communication, etc.).
- Active Exploration - Projects extend beyond the classroom by connecting to internships, fieldbased investigations, and community explorations.
- Adult Connections - Projects connect students with adult mentors and coaches from the wider community.
- Assessment Practices - Projects involve students in regular, performance-based exhibitions and assessments of their work; evaluation criteria reflect personal, school, and real-world standards of performance.
